

CAPABLE

CAnCER PATIENTS Better Life Experience

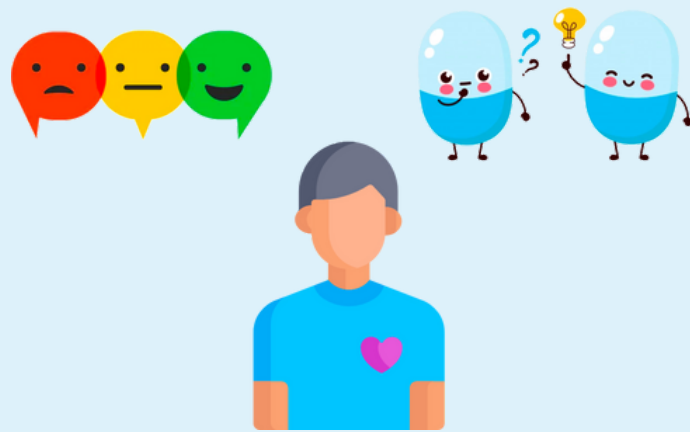

Support system for improving the quality of life of cancer home patients

What CAPABLE can do for you and your patients

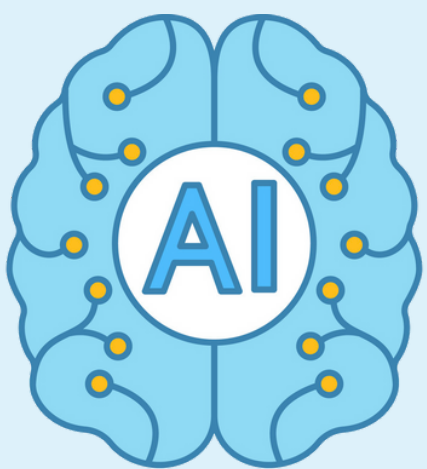

Facilitating the multidisciplinary management of your home patients

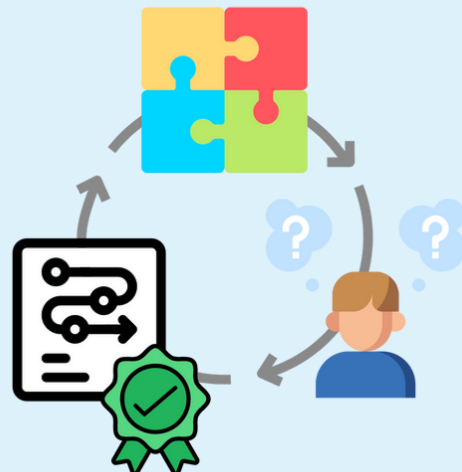

Promoting patients' engagement with improving compliance to treatment and facing patients' emotional issues

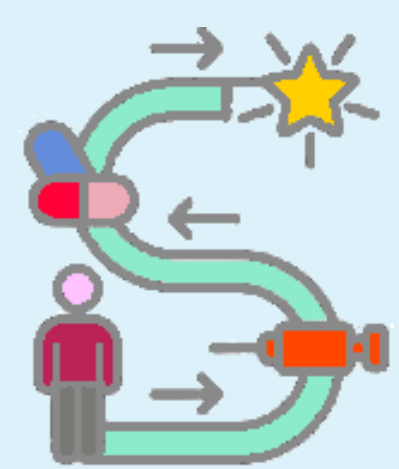

Promoting data management through standard terminologies, data modeling, and FAIR principles

Integrating and analysing (big) data coming from different sources using latest AI algorithms

Identifying gaps between clinical guidelines and patient needs, along with new adverse effects identification

Developing new predictive models of disease course
